

Who is Goodpack?

Goodpack, with the world's largest fleet of over 2 million IBCs, is principally engaged in the business of renting its patented, multi-modal, returnable metal box system, commonly known as Intermediate Bulk Containers (IBCs).

The company has a worldwide presence and through a global network of subsidiaries and regional offices, Goodpack provides a comprehensive service of delivery & collection of the IBC and technical support to all clients globally.

Why Goodpack?

Each Goodpack IBC can be set up or dismantled by a single person. Each IBC can eliminate up to 7 drums, reducing excess drum handling and disposal. The Goodpack IBC is a reusable solid galvanized steel box manufactured with high tensile steel, for maximum product protection.

The flexible and cost effective leasing program allows easy hiring locally and de-hiring globally, a solution that eliminates any upfront capex investment and, with our large global fleet, provides you cost savings from economies of scale.

Liquid Filling

Safe & Secure Stacking

Efficient Container Loading

Features & Benefits

Fully galvanized steel structure	High Tensile Steel Ensure product integrity Eliminates product contamination problems
Capacity by weight : 1650 kg	Equivalent to over 7 drums or 1.5 typical IBC's
Easy set up	Minimize labour cost Maximize payload
Non Wood packaging	Eliminate wood contamination
4 high stacking full IBC	Effective usage of space Reduce handling and storage cost
Hire / Dehire bins globally	International drop-off and collection service Minimize packaging waste management and disposal cost
Wide Applications	Variety of bladders both aseptic and non aseptic to suit any application Suitable for both containerised and break-bulk shipping Environmentally Friendly Reduces carbon footprint

Applications

- Toothpaste & Personal Care Products
- Edible Oil, Fat & Dairy Products
- Fruit Juice & Other Beverages
- Process & Frozen Foods
- Automotive Parts
- Non-Hazardous Chemical & Oleo Chemical Products
